Bag

You and your friend Taylor are sitting in a park. You pull out a piece of paper and tell Taylor, 'I just had an idea that I want to remember, but don't have anything to write with.' Taylor looks through her handbag and responds, 'Sure, I have...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**pen**	0.990
2	**crayons**	0.068
3	**chalk**	0.014
4	**makeup**	0.008
5	**cash**	0.002
6	**headphones**	0.000

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**pen**	1.000
2	**crayons**	0.976
3	**chalk**	0.829
4	**makeup**	0.136
5	**headphones**	0.090
6	**cash**	0.069

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
