Bakery

You and your friend Chris walk by a bakery. You say, 'I want some dessert.' Chris looks inside the bakery and responds, 'Sure, they have...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**cakes**	0.584
2	**ice cream**	0.464
3	**muffins**	0.104
4	**pretzels**	0.006
5=	**sandwiches**	0.002
5=	**water**	0.002

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**cakes**	0.933
2	**ice cream**	0.902
3	**muffins**	0.729
4	**pretzels**	0.498
5	**sandwiches**	0.296
6	**water**	0.033

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
