Beach

You and your friend Jess are packing to go on vacation. You tell Jess, 'There's a nice beach near our hotel, make sure you bring something to wear.' Jess looks in the closet and responds, 'Sure, I have my...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**bikini**	0.712
2	**shorts**	0.504
3	**jeans**	0.090
4	**sunglasses**	0.024
5	**jacket**	0.004
6	**coat**	0.002

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**bikini**	0.950
2	**shorts**	0.760
3	**coat**	0.537
4	**jeans**	0.510
5	**jacket**	0.369
6	**sunglasses**	0.213

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
