Cold

You and your friend Kennedy rent a small cabin in the mountains for a weekend. When you arrive, you shiver and say 'I'm freezing!' Kennedy looks around the cabin and responds, 'Sure, they have a...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**heater**	1.000
2	**fridge**	0.044
3	**microwave**	0.016
4	**sink**	0.002
5=	**blankets**	0.000
5=	**tea**	0.000

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**heater**	0.860
2	**blankets**	0.540
3	**microwave**	0.284
4	**tea**	0.205
5	**fridge**	0.150
6	**sink**	0.048

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
