Hot

You and your friend Grayson visit his grandparents' lake house after hiking on a hot summer day. You tell Grayson, 'It's sweltering in here!' Grayson talks to his grandparents and responds, 'Sure, they have their...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**heater**	0.340
2	**fan**	0.336
3	**shower**	0.014
4	**pool**	0.004
5	**blankets**	0.002
6	**couch**	0.000

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**pool**	0.460
2	**fan**	0.450
3	**shower**	0.303
4	**heater**	0.250
5	**blankets**	0.166
6	**couch**	0.000

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
