Mall

You and your friend Alex are hanging out in a newly opened shopping mall. You say to Alex, 'Let's get lunch!' Alex looks at the map of the mall and responds, 'Sure, this mall has a...

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**burger joint**	0.900
2	**pretzel stand**	0.862
3	**grocery store**	0.742
4	**coffee shop**	0.705
5	**gift shop**	0.193
6	**electronics store**	0.180

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
