Mask

You and your friend Carly go grocery shopping together. As you're about to enter the supermarket, you reach into your pocket and realize, 'I forgot to bring my mask!'
Carly looks through her bag and responds, 'Sure, I have my...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**bandana**	0.084
2	**wallet**	0.042
3	**gloves**	0.028
4	**handkerchief**	0.006
5=	**candy**	0.000
5=	**napkins**	0.000

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**bandana**	0.820
2	**handkerchief**	0.576
3	**napkins**	0.393
4	**gloves**	0.359
5=	**candy**	0.120
5=	**wallet**	0.120

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
