Meat

Your friend MJ is calling a ramen restaurant to order takeout. You tell MJ, 'I'd like meat in mine, please.' MJ gives your order over the phone, and then responds, 'Sure, they have...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**chicken**	0.896
2	**tofu**	0.254
3	**rice**	0.138
4	**mushrooms**	0.058
5	**turkey**	0.036
6	**crab**	0.006

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**chicken**	1.000
2	**turkey**	0.990
3	**crab**	0.767
4	**tofu**	0.350
5	**rice**	0.100
6	**mushrooms**	0.087

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
