Salad

You and your friend Ali are preparing dinner together. You tell Ali, 'I want to make a salad!' Ali runs to the corner store, and texts you, 'Sure, they have...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**lettuce**	0.998
2=	**dressing**	0.006
2=	**tuna**	0.006
4=	**chips**	0.000
4=	**meat**	0.000
4=	**cigarettes**	0.000

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**lettuce**	0.950
2	**meat**	0.550
3	**dressing**	0.522
4	**tuna**	0.339
5	**chips**	0.087
6	**cigarettes**	0.033

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
