Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**football**	0.960
2	**beach ball**	0.795
3	**boomerang**	0.730
4	**lawnmower**	0.160
5	**shovel**	0.133
6	**tires**	0.040

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
