Transport

You and your friend Dylan have been studying together at his uncle's house. Dylan suggests going into town to take a break. You say, 'Sure, but I don't want to walk.'
Dylan looks in the garage and responds, 'Sure, he has his...

Set Top-K (K = 20)

Exclusion probabilities: six experimental words

Rank	Word	Probability
1	**car**	0.986
2	**motorcycle**	0.830
3	**lawnmower**	0.020
4	**roller blades**	0.008
5=	**hammer**	0.000
5=	**chairs**	0.000

Human exclusion

Mean across five spoken alternatives

Rank	Word	Mean rate
1	**car**	0.880
2	**motorcycle**	0.801
3	**roller blades**	0.614
4	**lawnmower**	0.179
5	**chairs**	0.153
6	**hammer**	0.130

Bold words were tested in the experiment. No linking shows the top 5 continuations and up to 4 intervening words per experimental-word gap.
No linking positions refer to the full vocabulary; ... marks omissions. Set and human columns are independently ranked among the 6 experimental words; = marks ties.
Human rates average the five trigger-specific exclusion rates with equal weights. They summarize across spoken alternatives; the individual rates may differ.
Saved corrected Qwen2-7B results; Set uses 500 samples. Zero means 0/500 inclusions. No new sampling.
